SUMMARY

AI engineer focused on NLP and generative AI. I build in Python and measure each result before calling it done: an Arabic and English **RAG chatbot** that cites file and page, an **Egyptian Arabic sentiment model** that runs in the browser, and a **receipt-to-Excel extractor** evaluated on 100 test receipts. Currently working through the IBM AI Engineering Professional Certificate, and completed ITI DevOps training (Docker, Kubernetes, CI/CD, AWS). Looking for a junior AI/ML engineer role, remote preferred.

SKILLS

Languages: Python, C++, SQL (training)

Machine Learning & Deep Learning: PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face Transformers, Word2Vec, Seq2Seq (GRU/LSTM), text classification, data preprocessing, feature engineering, model training, model evaluation

NLP & Generative AI: RAG, LLMs, Gemini API, embeddings, BM25, Vector Databases (training), NLTK, Gensim, BLEU, perplexity

Data & BI: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Power Query, DAX, Excel, data cleaning, data visualization, NoSQL (training)

Tools & Deployment: Git, GitHub, Jupyter notebooks, Streamlit, FastAPI, model deployment (ONNX, Transformers.js in the browser)

DevOps & Cloud (ITI training): Docker, Kubernetes, CI/CD, AWS (fundamentals), Linux, Infrastructure as Code

PROJECTS

Arabic + English RAG Chatbot *Oct 2026*

Gemini, BM25 + embeddings, Streamlit | github.com/Younes695/arabic-rag-chatbot

- Answers only from the user's PDFs, cites file and page, and says "not found" instead of guessing.
- Rebuilds Arabic text from glyph positions, fixing reversed numbers and broken ligatures in PDF text extraction.
- **24/24** test questions answered correctly with the right page, and **4/4** unanswerable questions refused (small 6-page sample set).

Egyptian Arabic Sentiment Model *Oct 2026*

PyTorch, Hugging Face Transformers, CAMeLBERT, ONNX | github.com/Younes695/egyptian-arabic-sentiment

- Fine-tuned CAMeLBERT on ASTD (~10k tweets, 4 classes): **macro-F1 0.542** (mean of 3 seeds) vs **0.445** for a TF-IDF baseline.
- Compressed the model from 438 MB to 111 MB (-0.002 macro-F1) so it runs fully in the browser with Transformers.js.

Receipt-to-Excel Extractor *Oct 2026*

Gemini structured output, Pydantic | github.com/Younes695/receipt-extractor

- On 100 CORD test receipts: **90%** fully correct, **97.1%** item F1, total correct on 93 of the 95 receipts that print one.
- Compared schema-enforced output (90%) with a prompt-only JSON format (87%), and reviewed all 10 failures against the images.

NajdaAI: AI Medical Assistant (team of 3) *Aug 2026*

RAG, LLMs, FastAPI, React

- RAG pipeline over WHO, NICE and Egyptian Health Council guidelines; every answer cites its source.
- Triage into Normal, Moderate or Emergency, with an automatic alert to an emergency contact and voice chat.

Telco Customer Churn Dashboard *Oct 2026*

Power BI, Power Query, DAX

- 5-page interactive dashboard over **7,043 customers** (26.5% churn) with cleaning in Power Query, 9 DAX measures and slicers.

Car Price Prediction *2026*

Scikit-learn | github.com/Younes695/Car-Price-Prediction

- Compared Linear, Lasso, Ridge and Polynomial regression on a 10% hold-out set (about 30 cars): Polynomial best with **R^2 0.97** vs 0.84 for Linear and Ridge.

Breast Cancer Classification (ANN) *2026*

TensorFlow, Keras | github.com/Younes695/Breast-Cancer-Classification-ANN

- **98%** accuracy on 114 held-out samples, with precision and recall of 0.98 on both classes.

Earlier projects: Student Performance Prediction (Scikit-learn, Streamlit); telecom churn analysis dashboard (Python); IBM Generative AI NLP labs (Word2Vec, N-gram, Seq2Seq with BLEU and perplexity).

EXPERIENCE

Information Technology Intern, Suez Canal Authority *Jul 2026 - Aug 2026*

Port Said, Egypt (Hybrid)

- Completed the Authority's IT internship program: **Introduction to Generative AI** (Creativity & Excellence Center), Culture Transformation Program, Strategic Thinking Fundamentals, and Stress & Time Management.
- Wrote a final report on what I gained from the program.

AI Hackathon Participant, Orange Digital Center Egypt *Aug 2026*

With Creativa, TIEC and ITIDA

- Built NajdaAI with a team of 3 in a 5-day intensive hackathon: retrieval, generation, evaluation and triage logic.

Intern, Suez Canal Container Terminal *Jul 2025*

- Attended sessions on IT systems, management processes and digital solutions; gained exposure to enterprise IT operations in a container terminal.

EDUCATION

Port Said University *Oct 2023 - Jul 2027 (expected)*

B.Sc. in Information Technology Management, Faculty of Management Technology and Information Systems | GPA 3.61

CERTIFICATIONS AND TRAINING

- **IBM AI Engineering Professional Certificate** (in progress): Deep Learning with PyTorch; Generative AI and LLMs: Architecture and Data Preparation; AI Capstone Project with Deep Learning; Generative AI Foundational Models for NLP (all 2026)
- **DevOps Specialist Training**, Information Technology Institute (ITI), 123 hours (Aug 2026)
- **Data Analysis: Skills for Freelance Professional**, Digital Egypt Youth Program (MCIT / NTI), 120 hours, score 93% (Jan - Mar 2026)
- Deep Learning A-Z: Deep Learning and AI in Python (Udemy, Jul 2026); Intermediate Python Programming (ITI, May 2025); CS50 Introduction to Computer Science (Harvard); C++ Fundamentals

LANGUAGES

Arabic (native), English (very good, professional working proficiency)
