Abd-Elrahman Wael Younes

Artificial Intelligence Engineer

Port Said, Egypt | +20 100 505 6546 | abdelrahmanwaelit@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Aspiring AI Engineering Intern with hands-on experience across Machine Learning, Deep Learning, and Generative AI. Built 6+ projects including NajdaAI (RAG medical assistant, AI Hackathon), Student Performance Prediction System (Streamlit), Ooredoo Customer Churn Dashboard, Car Price Regression, and Breast Cancer ANN (TensorFlow). Completed 8/13 of the IBM AI Engineering Professional Certificate (Machine Learning, Deep Learning with PyTorch, Generative AI & LLMs). Completed ITI DevOps Specialist training (Docker, Kubernetes, CI/CD, AWS) to deploy and maintain ML systems (MLOps). Strong Python/PyTorch foundation, competitive programming background (ICPC Junior), and enterprise IT exposure from Suez Canal Container Terminal. Seeking an AI/ML internship to build and deploy NLP and GenAI solutions.

TECHNICAL SKILLS

Languages: Python, C++

Machine Learning & AI: PyTorch, TensorFlow, Scikit-learn, Keras, Word2Vec (CBOW / Skip-gram), GloVe, N-gram Language Models, Seq2Seq (Encoder-Decoder, GRU/LSTM), Transformers (foundations), Teacher Forcing, Model Evaluation

NLP & Generative AI: NLTK, TorchText, Gensim, BLEU, Perplexity, Tokenization, Embeddings, RAG (Retrieval-Augmented Generation), Vector Databases, Large Language Models (LLMs)

Data: Data Analysis, Data Visualization, Pandas, NumPy, Matplotlib, Seaborn, SQL, NoSQL

Tools: Git, GitHub, Jupyter Notebook, Streamlit, FastAPI

DevOps & Cloud: Docker, Kubernetes, CI/CD Pipelines, AWS (Fundamentals), Linux, Computer Networks, Infrastructure as Code (IaC)

Soft Skills: Problem Solving, Teamwork, Communication, Leadership, Time Management, Strategic Thinking

PROJECTS

NajdaAI - AI Medical Assistant (AI Hackathon, Team of 3) | RAG, LLMs, FastAPI, React

- Built a RAG pipeline over trusted medical guidelines (WHO, NICE, Egyptian Health Council) so every answer cites its source; covered retrieval, generation and evaluation.
- Triage classifies cases as Normal / Moderate / Emergency; emergencies trigger a siren and an automatic alert to the user's emergency contact, with voice chat support.

Student Performance Prediction System | Python, Scikit-learn, Streamlit | github.com/Younes695

- Built regression & classification models to predict student outcomes; developed an interactive Streamlit web app with advanced data visualization.

Ooredoo Customer Churn Analysis & Prediction Dashboard | Python, Machine Learning | github.com/Younes695

- Analyzed customer churn patterns for telecom data and deployed a prediction dashboard for business insights.

Gen AI Foundational Models for NLP - IBM (Sep 2026) | PyTorch, TorchText, Gensim

Hands-on labs: Document Classification (EmbeddingBag, AG_NEWS), Neural N-gram Language Modeling, Histogram N-gram Analysis (NLTK), Word2Vec CBOW/Skip-gram with t-SNE visualization, and Seq2Seq LSTM translation (Multi30K) evaluated with BLEU & Perplexity.

Car Price Prediction | Regression, Feature Engineering

- Built and evaluated regression models to predict used-car prices; covered feature engineering and model comparison.

Breast Cancer Classification (ANN) | TensorFlow

Designed and trained an Artificial Neural Network to classify tumors as benign/malignant with preprocessing and evaluation.

PROFESSIONAL EXPERIENCE

AI Hackathon Participant - Orange Digital Center Egypt x Creativa *August 2026*

- Collaborated in a 5-day intensive team hackathon to build an AI solution from scratch; first-time team collaboration under time constraints.

Machine Learning Intern - Codveda Technologies *January 2026*

- Completed Level 2 ML Internship; built, trained and evaluated ML models on real-world datasets.

IT Intern - Suez Canal Container Terminal (SCCT) *July 2025*

- Completed internship focused on IT and management practices in large-scale logistics operations.
- Attended sessions on IT systems, management processes and digital solutions.
- Gained real-world exposure to enterprise IT operations and container-terminal management.

Contestant - ICPC (International Collegiate Programming Contest) *October 2023 – July 2024*

- Competed in algorithmic problem-solving challenges, reaching Junior level.
- Practiced advanced problem-solving and teamwork under contest conditions.

EDUCATION

B.Sc. in Information Technology Management *October 2023 – July 2027 (Expected)*

Port Said University - Faculty of Management Technology and Information Systems | GPA: 3.61

CERTIFICATIONS & TRAINING

Machine Learning & AI:

- Gen AI Foundational Models for NLP & Language Understanding - IBM / Coursera (September 2026)
- DevOps Specialist Training - Information Technology Institute (ITI), 123 hrs (August 2026)
- Generative AI and LLMs: Architecture and Data Preparation - IBM / Coursera (August 2026)
- AI Capstone Project with Deep Learning - IBM / Coursera (August 2026)
- Deep Learning with PyTorch - IBM / Coursera (August 2026)
- Deep Learning A-Z: DL, AI in Python & AWS + LLM Prize - Udemy (July 2026)
- Introduction to Generative AI - Suez Canal Authority, Creativity & Excellence Center (July 2026)
- Data Analysis: Skills for Freelance Professional - Digital Egypt Youth Program (MCIT / NTI), 90 technical + 30 freelancing hrs, Score 93% (January –March 2026)
- Intermediate Python Programming - ITI (May 2025) | CS50: Introduction to Computer Science - Harvard University | C++ Fundamentals

Professional Development:

- Culture Transformation Program (CTP) Suez Canal Authority (July 2026)
- Strategic Thinking Fundamentals - Suez Canal Authority (July 2026)
- Stress & Time Management - Suez Canal Authority (July 2026) | Internship Graduation Project - Suez Canal Authority (July 2026)
- Employability Skills - Be Ready (September 2025) | I'm Responsible Too - NTA (July 2025)

LANGUAGES

Arabic: Native | English: Very Good (Professional Working Proficiency)
